Independent Description of the smart-contract functionality

The LuckyReflectionsToken Smart-Contract provides the opportunity to hold tokens in your wallet and earn passive income without staking.

- ✓ It is a reflective and deflationary token that will return a profit to every user that holds the tokens in his wallet.
- ✓ The profit will be made by transactions. In each transaction, a share will be reflected as profit to holders.
- ✓ All libraries which were used for calculation and the token in the contract are standard and safe

Haze Security is a 3rd party auditing company who works on audits based on client requests. And as a professional auditing firm, we check on the contract for any vulnerabilities, backdoors, and/or scam scripts.

Therefore:

We are not financial advisors nor do we partner with the contract owners

Operations and website administration is fully on the client's side

We do not have influence over client operations, which can lead to website changes, withdrawal function closes, etc. One always has the option to do this through the contract.

Any concerns about the project themselves need to be raised directly to the project owners and not through Haze Security.

Investors are not in any way obliged, coerced or influenced to invest in projects audited by Haze Security.

We are not responsible for your funds or guarantee you profits.

We highly recommend that investors do their own research and gain crypto experience before investing

To report any scam, malpractices and irregularities, please send a message via Telegram to @Haze013 or @Sara_Solidity for blacklisting.
